OUR COMPANY

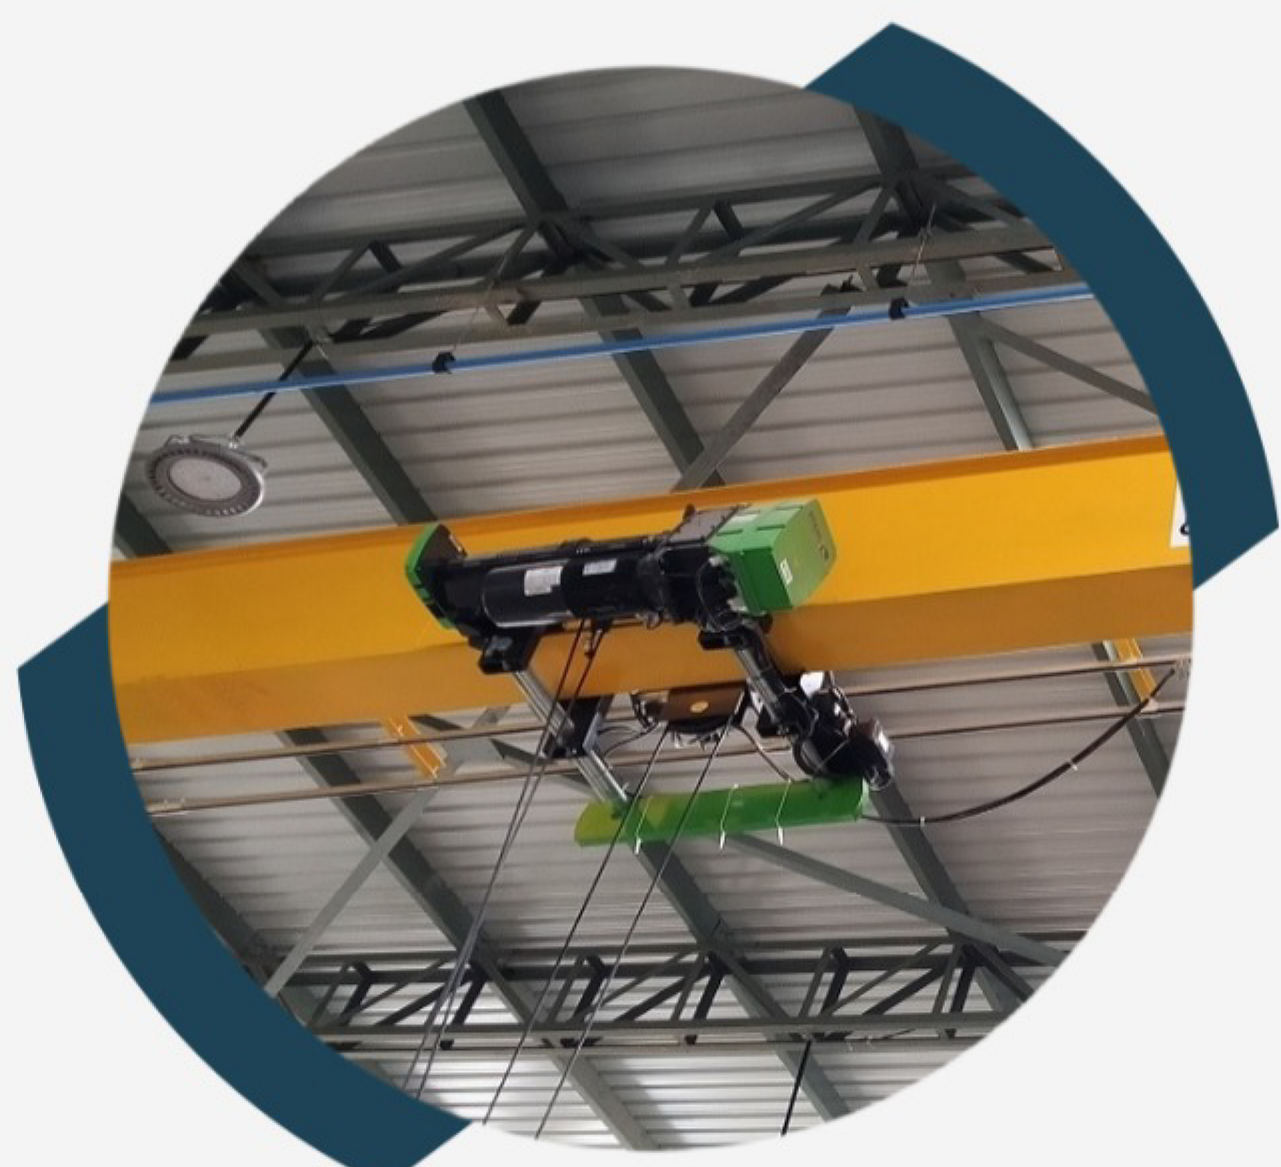

Ace Engineering Technologies is one of India's leading manufacturers and service providers of Cranes and Material Handling Equipments. Since its journey started in 2004, the company's knowledge and experience have evolved over the years. This has helped expand its capabilities to offer you the complete range of Cranes and Material Handling Equipments with custom designing, manufacturing, assembly, erection and crane services.

OUR INFRASTRUCTURE

At Ace Engineering Technologies, all of our Cranes are manufactured at our workshops located in the heart of Bangalore, India. We have a specialized Crane Manufacturing Area spread across 5000 Sq Ft, which employs the latest manufacturing techniques. We have a dedicated, skilled, and experienced workforce that ensures our equipment is manufactured to the highest industry standards.

We're also an OEM partner for the supply, installation, and service of Germany-based M/s. Stahl Cranes and Systems.

OUR RANGE OF CRANES

Single Girder EOT Crane

Double Girder EOT Crane

Jib Crane

Goliath / Gantry Crane

Stahl Electric Wire Rope Hoist

Electric Wire Rope Hoist

OUR CRANE SERVICE

We are committed to providing high-quality Cranes and Hoists and other material handling equipment to our esteemed clients. We have a stringent quality control process in place to ensure our equipment is absolutely safe, defect-free, and highly functional. We also have qualified technical staff on board, which helps us maintain consistent, superlative performance standards for all our equipment.

Our Express Services are designed to handle Breakdown Calls and Emergency Shut Down cases. Our Field Services include AMCs (Annual Maintenance Contracts), Load Testing, Health Checkups, Safety Certification, and Crane Inspection and Training. You can also use our Spare Parts Services to get crane and hoist components.

All our services are completed under the strict supervision of qualified project managers with a constant eye on the safety of employees while meeting any legislation in force and our client's business requirements.
